EDUCATION

New York University Shanghai

Bachelor of Science in Interactive Media Arts and Computer Science (minor)

May '27

Shanghai, China

- Cumulative GPA: 3.7
- Relevant Courses: Creative Coding Lab, Nature of Code, Human Computer Interactions, Data Structures and Algorithms

New York University New York

• Course work in Front End Web, Topics in Computation and Data, Dynamic Web Development

Honors: Dean's Honor list (2023-2025), Social Impact Award

WORK EXPERIENCE

MNE

Jun '26 - Present

Front-end developer

- **Redesigned and independently implemented the company website** using React, JavaScript, and Anime.js, as the frontend developer, replacing an outdated, low-contrast, static interface with an animated, modern UI.
- **Improved page load performance by ~83%**, reducing Largest Contentful Paint (LCP) from 12s to under 2s through image optimization.

AES Group Inc

Jun '26 - Jun '26

UX Research & Digital Design Intern

Remote

- Organized & tracked end-to-end logistics for **5 to 10 usability studies & surveys**, ensuring smooth research operations & adherence to timelines
- Assisted in developing research plans and discussion guides, supporting user-centered design decisions.
- Collaborated with designers & product managers to translate research findings into **actionable deliverables**, including reports & personas, enhancing user experiences

NYU Shanghai

Jan '25 - May '25

Learning assistant - Creative Coding Lab

Shanghai, China

- **Technical Mentor for 30+ students**, providing 1:1 guidance on programming concepts including p5.js, GitHub version control, and algorithmic design.
- **Debugged and reviewed 10+ codebases weekly**, ensuring the successful deployment of creative coding projects and interactive media installations.

PROJECTS

Naqsh

Apr '26 - May '26

Physical exhibition installation

- Facilitated an interactive cultural experience by coordinating the real-time installation of a **10,000×10,000px shared canvas**, utilizing physical installation techniques to enable visitors to generate & display Islamic geometric patterns
- Monitored multi-user presence & tile placement synchronization in real time using **Socket.io**, enhancing user experience throughout the exhibition by ensuring a reliable, accumulating record

Bookflix

Sep '25 - Dec '25

Full Stack discovery platform

- **Reduced search-to-insight time by 60%** by building a discovery platform with AI-generated summaries and real-time Google Books API integration.
- **Optimized backend data flow** in Node.js/Express, implementing debounced API calls and managing multiple LLM models (Ollama) for concurrent content delivery

One Chorus Bot

Oct '25 - Oct '25

Lead AI Systems Developer

- **Engineered a real-time audio pipeline** using the Web Audio API and voice-activity detection, achieving end-to-end response times of **under 5.5 seconds**.
- **Integrated three neural models** (Whisper STT, SmolLM2 LLM, Kokoro TTS) via Transformers.js for client-side speech processing and poetic text generation.
- **Optimized browser performance** by implementing quantized models to efficiently manage **~1.2GB of WebGPU model weights**, ensuring stability across different hardware.

SKILLS

- Frameworks & Libraries: React, React Native, Node.js, Express, Socket.io, p5.js, Transformers.js, JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
- Tools & Technologies: Git, WebGPU, Web Audio API, Ollama LLM, Google Books API, RESTful APIs, Adobe Creative Suite.
- Languages: Urdu (native), English (fluent), Sindhi (fluent), Chinese (Intermediate)
