EDUCATION

NYU Shanghai

Bachelor of Arts, Interactive Media Arts, Minor in Computer Science

May '27

Shanghai, China

- Cumulative GPA: 3.7
- Relevant Courses: Creative Coding Lab, Nature of Code, Human Computer Interactions, Introduction to Computer and Data Science, Data Structures and Algorithms, Front End Web, Topics in Computation and Data, Dynamic Web Development

Honors

- Dean's Honor list (2023-2024), Dean's Honor list (2024-2025), Social Impact Award

WORK EXPERIENCE

MYK Global Forwarding

Jun '25 - Present

Web developer intern

Remote

- Built responsive web and Android application for the shipping services to accelerate digital adoption by delivering a seamless customer experience using JavaScript and WordPress
- Executed debugging strategies to optimize site performance, resulting in a 10% decrease in cart abandonment, reduced error rates, & heightened customer satisfaction utilizing JavaScript for troubleshooting

NYU Shanghai

Jan '25 - May '25

Learning assistant - Creative Coding Lab

Shanghai, China

- Aided 30+ students from 10+ countries in grasping creative coding concepts like generative art, interactive media, & algorithmic design through hands-on guidance, and conceptual explanation.
- Facilitated project collaboration by providing 1:1 guidance to students on programming concepts, p5.js, and GitHub, contributing to the success of 10+ creative coding projects each week.

NYU Shanghai

Dec '24 - May '25

Study Away Program Ambassador

Shanghai, China

- Designed weekly newsletters to deliver essential updates, resources, & engagement opportunities for 120+ students, introducing a dining recommendation section to enrich their exploration of Shanghai.
- Led intercultural workshops for 50+ students from 20+ countries in collaboration with the Study Away department, promoting cross-cultural integration & enhancing language proficiency.

PROJECTS

Bookflix

Sep '25 - Dec '25

Node.js, Express, p5.js, Ollama LLM, Google Books API, Vanilla JS

- Reduced search-to-insight time by 60% by building a full-stack book discovery platform with AI-generated summaries (Ollama LLM) and real-time Google Books API integration.
- Optimized backend API and data flow with Node.js/Express, implementing debounced calls and managing multiple LLM models for efficient AI content delivery.

Tessera

Nov '25 - Dec '25

Node.js, Express, p5.js, Vanilla JS, Socket.io, File System API

- Enabled 84+ simultaneous users on a collaborative canvas by architecting a real-time application with WebSocket synchronization (Socket.io) and a Node.js/Express backend.
- Engineered a symmetry drawing engine using p5.js, creating dynamic geometric patterns with configurable mirroring and a persistent tile gallery via Base64 image storage.
- Optimized performance and data flow by implementing efficient Base64/JPEG compression, client-side caching, and a RESTful API for managing tile artwork and metadata.

One Chorus Bot

Oct '25 - Oct '25

AI Systems Developer, Speech Processing Engineer

- Built a fully voice-driven AI conversation bot using Transformers.js, integrating three neural models (Whisper STT, SmolLM2 LLM, Kokoro TTS) for real-time speech processing and poetic response generation.
- Engineered the full real-time audio pipeline, from Web Audio API capture and volume-based voice detection to token streaming and TTS playback, achieving an end-to-end response time under 5.5 seconds.
- Optimized cross-browser performance and model loading, implementing quantized models, a three-state conversation machine, and dynamic visual feedback to manage ~1.2GB of WebGPU model weights efficiently.

SKILLS

- Computer Skills: Python, JavaScript, HTML, CSS, React, React Native
- Languages: Fluency in English, Urdu and Sindhi. Intermediate level in Chinese
- Marketing: Adobe Illustrator, Photoshop, Audition and Premier Pro, Canva
